SUSTAINABLE FOOD ADVOCATES TO MAKE APPEARANCE AT  
GREEN FESTIVAL 2007

WHAT: Karen Hudson, consultant for [GRACE Factory Farm Project](#), will be speaking about sustainable food and moderating a panel on the same subject at this weekend's [Green Festival](#) in Chicago.

WHO: Karen Hudson is a consultant for the GRACE Factory Farm project as well as founder of FARM (Families Against Rural Messes) and a fifth-generation family farmer. Diane Hatz, Executive Director of [Sustainable Table](#) and Executive Producer of [The Meatrix](#), and Patty Lovera, Assistant Director of [Food & Water Watch](#), will also attend the festival. The three can answer any questions at the Sustainable Table/GRACE booth. Stop by and say hello (and ask for details on the Sustainable Table cross country road trip to Farm Aid, kicking off August 6th in Hollywood, CA!)

WHEN: April 21 & 22, 2007

Karen Hudson to make her panel appearance at noon on Saturday the 21st.  
Sustainable Table will have a booth in the exhibit area both days.

WHERE: Chicago's Green Festival  
McCormick Place/ Lakeside  
2301 S. Lake Shore Drive  
Chicago IL 60616

WHY: Because this weekend is Earth Day, and un-sustainable food production methods (factory farming) are not only harmful to animals, family farmers, and communities, but they are also a leading contributor to global warming, and a major source of water pollutants and land degradation.

[GRACE Factory Farm Project \(GFFP\)](#) works to help communities protect themselves from the adverse human health, environmental, and socioeconomic impacts of industrial livestock production.

[Sustainable Table](#) celebrates the sustainable food movement, educates consumers on food-related issues and works to build community through food.

[Food & Water Watch](#) is a nonprofit consumer rights group based in Washington, D.C. that challenges the corporate control and abuse of our food and water resources.
